SCOTT & MAIKA WONG

Superior design and craftsmanship are of the highest priority for Scott and Maika Wong of Casa Solterra. Our aspiration is to incorporate more thoughtful floor plans, simplicity in massing, fine detailing, rich finishes, and enduring quality.

In keeping with the philosophy of "small is beautiful", this 1900 sq.ft. Eastside home is a fully-featured "jewel-box" with a soft-contemporary feel. Located 4 blocks from the Historic Plaza, Casa Joya features 2 en-suite bedrooms as well as a wonderful master. There's a chefs kitchen which opens to the living and dining area. A wall of French doors open to a large portal, making this home perfect for entertaining. Special touches include hardwood floors throughout, 4 fireplaces, exposed beams, antique Mexican doors and a bonus 750sq.ft. heated basement!

Casa Joya was built green. Elements include insulated concrete form construction, use of recycled materials, a 94% high efficiency boiler, HRV air exchange system, low-flow toilets, solar ready, super insulation, energy star appliances and highly efficient windows and doors.
